

CSS Cheat Sheet

Here's a quick summary of how to add styles to your web page & some basic CSS styles that we have learned so far in our course. Keep this handy for a quick recap.

Internal, External & Inline Styles

Type	Syntax	Example
Internal	<pre><style> selector { property1 : value1; property2 : value2; } </style></pre>	<pre><head> <style> div { background-color : blue; height : 80px; } </style> </head></pre>
External	<pre><link href="..." rel="stylesheet" type="text/css"></pre>	<pre><link href="styles.css" rel="stylesheet" type="text/css"></pre>
Inline	<pre>style="property1 : value1; property2 : value2"</pre>	<pre><div style="background-color : blue; height : 80px"></pre>

CSS Styles

Property	Example Values	Example Selectors	Description
color	blue #004474 rgb(255,20,45)	p, div, h1, h4, a	Text color
